

QV Equities Limited

Factsheet as at 31 December 2016

QV Equities Limited provides a unique opportunity to invest in a quality portfolio of ASX listed entities outside the S&P/ASX 20 Index, managed by Investors Mutual Limited (IML).

Investment objective

QV Equities' aim is to achieve long term value via a combination of capital growth and income and aims to achieve net returns that are higher than the S&P/ASX 300 Accumulation Index excluding the S&P/ASX 20 Index over a 5+ year investment horizon.

Investment strategy

QVE's strategy will seek to meet the objective above by investing in a diversified portfolio of quality ASX listed Australian and New Zealand entities outside the S&P/ASX 20 Index.

Investment philosophy

IML's investment philosophy is based on the premise that over the long-term, a company's share price will reflect its underlying inherent value. We seek to buy and own companies with a competitive advantage, recurring earnings, run by capable management, that can grow at a reasonable price.

Our competitive advantage

- Broader & more diverse investment opportunities
- Balanced focus on sustainable capital & dividend growth
- Leverage expertise of Investors Mutual Limited
- Bottom up research driven investment process

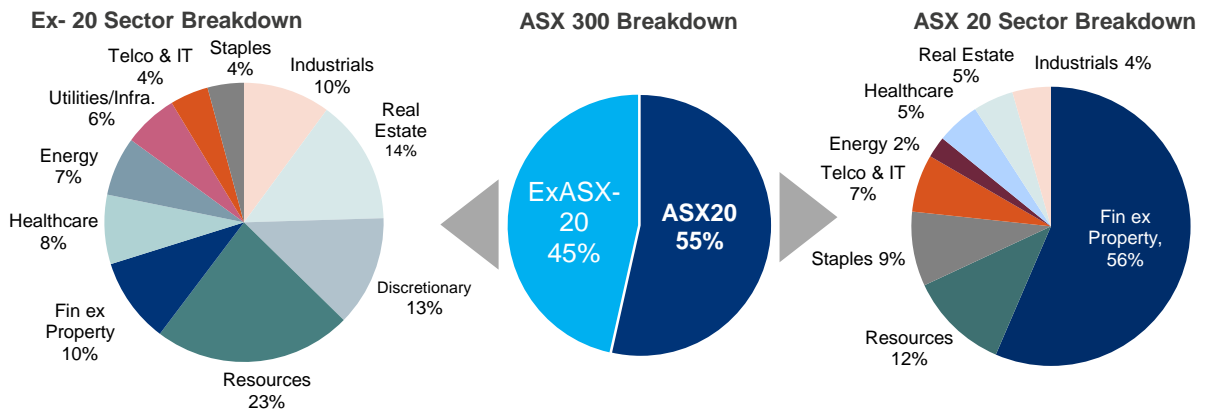

Why ex20?

The Australian share market is heavily concentrated amongst the largest companies both in terms of market capitalisation and industry sector. The top 20 stocks now dominate the share market with the S&P/ASX 20 stocks amongst the most widely held and researched companies in Australia.

As a consequence the Manager (IML) believes the Ex-20 Segment offers greater opportunities for above market returns as a result of the identification of securities that:

- are typically less researched by brokers
- can generate above average long term earnings growth
- pay sustainable, regular dividends that can grow over time

ASX 300 Breakdown

QV Equities Limited
