

QV Equities Limited (QVE)

31 December 2020

QVE provides a unique opportunity to invest in a quality portfolio of ASX listed entities outside the S&P/ASX 20 Index, managed by Investors Mutual Limited (IML).

Investment objective

QVE's objective is to achieve net returns that are higher than the S&P/ASX 300 Accumulation Index excluding the S&P/ASX 20 Index over a 4+ year investment horizon.

Investment strategy

QVE aims to achieve long term value via a combination of capital growth and income by investing in a diversified portfolio of quality ASX listed Australian and New Zealand entities outside the S&P/ASX 20 Index.

Investment philosophy

IML's investment philosophy is based on the premise that over the long-term, a company's share price will reflect its underlying inherent value. We seek to buy and own companies with a competitive advantage, recurring earnings, run by capable management, that can grow at a reasonable price.

Our competitive advantage

- Broader & more diverse investment opportunities
- Balanced focus on sustainable capital & dividend growth
- Leverage expertise of Investors Mutual Limited
- Bottom up research driven investment process

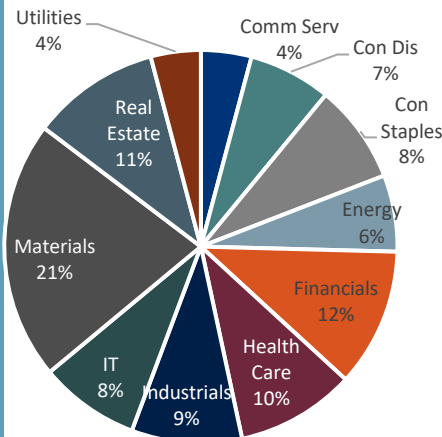

Why ex20?

The top 20 stocks dominate the Australian share market and are amongst the most widely held and researched companies in Australia. IML believes the ex-20 segment offers greater opportunities for above market returns as a result of identifying securities that:

- are typically less researched by brokers
- can generate above average long-term earnings growth
- pay sustainable, regular dividends that can grow over time
